Project: Bubble Painting

***Ask an adult for help with this one!**

Supply List

1. 2-3 cups of **Bubble Solution** (see **Bubble Solution** instructions)
2. Food colouring in assorted colours
3. One container for each colour of food colouring
4. Bubble wands or straws
5. Newspaper
6. White paper

Steps

1. Cover work surface with newspaper so it won't get stained by the food colouring.
2. Pour some bubble solution in each container. Add one colour of food colouring to each container – add more for brighter colours.
3. **Option 1**: Using a straw, blow into the solution in each container to make it bubble up. Place paper over top of the bubbles so that they pop onto the paper. Repeat with other colours to make a beautiful pattern.
   Option 2: Dip straws or bubble wands into the coloured solution and blow coloured bubbles onto the paper to create a pattern.

Tip

Make sure to wear old clothes - the food colouring will stain anything it touches, even if it's mixed with bubble solution.

Congratulations! You've just made a beautiful bubble painting!
