Four Little Stars
Four little stars winking at me.
One shot off, then there were three!

three little stars
With nothing to do.
One shot off, then there were two!

Two little stars Afraid of the sun.
One shot off, then there was one!

One little star
Alone is no fun.
It shot off, then there was none!

Space facts
• Space is completely silent
• There are between 200-400 billion stars in our galaxy, The Milky Way
• Venus is the hottest planet, with a surface temperature of 450° C / 842° F
• The Moon was once a piece of Earth
• A full NASA space suit costs $12 million

Vocabulary
Asteroid: small solar system bodies that orbit the Sun. They are made of rock, metal, and organic compounds.
Astronaut: someone trained to be a crew member of a spacecraft. Also called a cosmonaut.
Comet: a relatively small solar system body that orbits the Sun. Comets display a visible coma (fuzzy outline) and sometimes a tail.
Galaxy: a large group of stars, dust, gas, and dark matter held together by gravity.
Star: a huge, bright ball of burning gas that is held together by gravity. The Sun is the closest star to Earth.

Space action
Sung to: "London Bridges"

The planets spin around the sun,
Around the sun, Around the sun.
The planets spin around the sun,
We live on earth!

The sun is found in the middle,
In the middle, In the middle.
The sun is found in the middle,
It keeps us warm!
The stars are twinkling far away,
Far away, far away.
the stars are twinkling far away,
Now make a wish
