

STEAM CRAFTS

For hands on learning using any materials you can find

WAKA

Design and create a raft/waka that can carry the weight of 4 eggs in the water.

PAPER PLANE

Create the ultimate paper plane. Measure the distance it travels from. Maximum distance is essential.

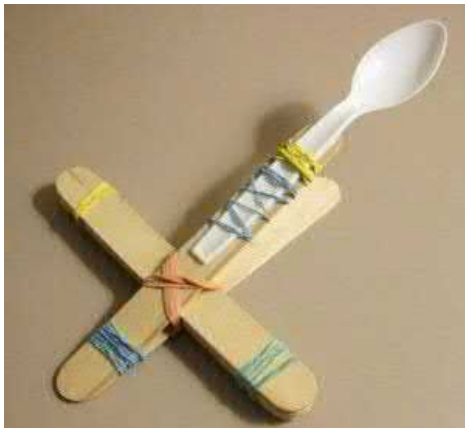

PARACHUTE EGG

Your egg is falling from the sky, design a solution so that your egg can survive the fall.

CATAPULT

Using rubber bands, popsicle sticks and a spoon create a catapult that can launch small objects.

BALLOON POWERED CAR

Using a balloon as your only source of energy, create a car from materials you can find at home. Remember to create a space on your car for the balloon.
