

LVCCLD Shared Vehicle Procedure to Mitigate Covid-19 Exposure

Before Vehicle Use

1. Driver should monitor their health. If driver is experiencing any symptoms, including a mild cough or mild fever, they should advise their supervisor and plan to go home.
2. Practice hand hygiene by washing hands with soap and water.
3. Take hand sanitizer and alcohol spray with you.
4. Disinfect high touch surfaces using alcohol/water spray and paper towel (kept in vehicle). These surfaces include, but are not limited to:
 - o Interior/exterior door handles and interior grab handles
 - o Pads and armrests
 - o Steering wheel
 - o Shift lever
 - o Console and all control buttons and knobs (radio, climate control, etc.)
 - o Turn signal and wiper stalks
 - o Seat and seat adjustment button or lever
 - o Other commonly used surfaces

During Vehicle Use

1. Avoid touching your face with unwashed hands.
2. As much as possible, social distancing practices should be observed.
 - o If trip requires two occupants:
 - Use rear seat, where possible.
 - If occupants must be seated next to one another, use face coverings.
 - Avoid all physical contact with one another.
 - o At your destination:
 - Maintain 6 feet distance from others and avoid all physical contact.
 - Avoid touching surfaces as much as possible.
 - Prior to departure, wash hands with soap and water. If not available, use hand sanitizer.

After Vehicle Use

1. Repeat disinfection of high touch surfaces (see #4 above).
2. Wash hands with soap and water.
3. Return hand sanitizer and alcohol spray.

As an added safety measure, all LVCCLD shared vehicles have been treated with Micro Shield 360, a non-toxic, hypoallergenic, EPA registered, FDA, SNHD approved coating system. Micro Shield 360 is an antimicrobial coating that molecularly bonds to a surface and prevents the spread of germs from one person to another.
