# Pre-Literacy Practices

Five ways to help your child get ready to read:

## Singing

Sing every chance you get! Singing slows down language and helps children hear the smaller sounds in words. Songs expose children to words they don't hear in everyday language. This vocabulary boost helps them when they learn to read.

## Reading

Curl up with a book at bedtime, or any time. Keep books everywhere: in the car, stroller, and bath tub. Role model the love of reading together. Most kids who have been read 1,000 books by the time they start Kindergarten are ready to learn to read.

## Talking

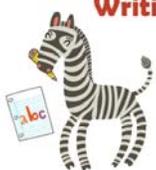

Even newborns benefit from lots of talking! Tell stories, talk about the books you read, use new words, start conversations. Ask open-ended questions, giving children time to think and answer. Talking back and forth uses four parts of the brain; it takes young children extra time to form responses.

## Playing

Play is the "work" of children. Pretend play builds vocabulary, stretches the imagination, and nurtures pre-reading skills. Symbolic play (This box is a car! A boat! A train!) is the same type of thinking that allows them to understand that a picture or the written word represents a real thing.

## Writing

Play with a variety of writing tools. Color, draw, scribble, and write with crayons, chalk, or sticks in dirt or sand. Writing activities help children understand that writing and print has meaning. Developing fine motor skills prepares children for writing.
