

# Need magnification and speech? Try ZoomText!

- ZoomText makes words and pictures on the computer look bigger. It can also speak text aloud.
- Select ZoomText from the list of available programs. You can then choose the options you want using the ZoomText keyboard keys:

- Because ZoomText is magnifying the screen, you will only be able to see part of the screen at a time. For example:

To see other parts of the screen, just move your mouse. The view will move at the same speed and direction as the mouse movement.
