“After March Break, the world slowly turned into a nightmare!”

“When I first saw the email that said there is a three week March break, I was super excited because March break was extended. After the March break, The world slowly turned into a nightmare! The Coronavirus is also known as COVID-19 was soon spreading to the whole entire world. People say this virus was created in Wuhan, China in a university. Wuhan was in lockdown. This virus only impacted China, then travelers from China came to their homeland and spread the virus. The people in cruises were mostly impacted by COVID-19 because they were very close together. My March break trip was even impacted by the COVID-19. My family, friends, and cousins were all going to go on our first cruise during the march break. This cruise was going to Mexico, Jamaica, Cayman Island, and the Bahamas. Once this virus had started to spread in Canada and people started to get the COVID-19 quicker on cruises we had to cancel our trip. During this time I have learned a lot of different activities. I always wondered how to solve a Rubik's cube. So I started to watch videos on how to solve it and now I can solve a Rubik's cube. I also learned to bake with the help of my mom. Now I can bake a cake, and cupcakes, I am planning to learn more. In addition, I also learned yoga with the help of my mom. Now I do yoga early in the morning before online school every day. Sun salutation is my favorite yoga pose. My goal was to get better at painting. I have accomplished little by little, so this time is a time to accomplish a goal. Staying home has lots of benefits but also has some cons. One of the cons is that I miss so many things. I miss the teachers, friends, family, parks, and library. COVID-19 did not only change people, it also changed the world. In the beginning, I was very happy and excited, but slowly that changed to worried, and panicked. As soon as this pandemic is over I want to go see my cousins and friends because it has been so long since I have seen them. I also want to go outside to shop, ride my bike and play badminton!! The last thing I want to

do is to have a blasting party with my family, friends, and cousins. I am very thankful for my family, home, online school, heath, and nature. This situation has taught me that your family is important. Your family is like your 5 senses. Always make sure to spend time with them. Nothing is more important than your family.”
