“Spending time with my kids is meaningful (sometimes makes me crazy of course) and cheers me up a lot.”

“My 1st kid is 4 years old. She goes to daycare every day before and she really enjoys playing at the playground. But after lockdown, she had to get used to being at home and accepting a situation where she couldn't go to the playground. We installed a swing in the backyard for her. She talks about what she wants to do when the bad virus ends. I feel bad for her. However spending time with my kids is meaningful (sometimes makes me crazy of course) and cheers me up a lot. I hope this hard time will end asap!”
