**“My computer skills improved a lot and I now can make salad and help my mom to bake. I also like doing arts and crafts and play with my sister at home.”**

“I am 6 years old. It is my first year in a new school and I am learning French. I have been having home school since mid-March. I enjoy home school, as much as going to school. I like learning Chinese from my grandma, and learning all the other subjects with my parents. I get to stay home a lot, which I never got to before the virus. My computer skills improved a lot and I now can make salad and help my mom to bake. I also like doing arts and crafts and play with my sister at home. I will still want to spend more time learning at home after the virus.”
