Title: How COVID-19 Has Affected my Life

I've been away from school for almost 3 months, because of COVID-19.   I feel sad and scared because the virus is harming people. I do not like listening to the news, because sometimes it says sad and scary things, which I do not like. Let me tell you about how this pandemic has changed my life.

This pandemic changed my life by making me stay inside and liking being inside more than being outside in the fresh, wonderful outdoors. I feel lonely without friends to play with me outside.

I have learned new ways to communicate with my friends. The resources I use to communicate with friends are WebEx, Zoom and Messenger for Kids. When I use Messenger for Kids, it makes me feel happy, knowing that I have someone to talk to when I am bored or lonely. When I talk to my friends on Messenger for Kids, we play Roblox. It's where people can play any game, like Adopt Me, with their friends. I love playing this game! I use WebEx for school. Every day, we have 2 WebEx classes. I get to see my teacher and friends. We do class work during our WebEx, which gives us less work to do by ourselves. On Zoom, I have soccer practice 2 times a week, which is Mondays and Thursdays. I like the Thursday practice, because it is closer to the weekend than Monday. During practice, I feel confident, because some of the moves we do, I did in my old soccer club. I like it, when we go on Zoom, because there are always new moves to learn.

I wish this sickness would go away, so I could see my friends. I love sharing my experience and telling you how I feel, and I hope everyone is staying well.
