“It was a Thursday. I was excited for March break and then my Mother broke the news. We were no longer going to Disney World.”

This was because there was a virus out in the world. Disney World was also closed because of the virus and now we are stuck at home. We can only leave the house if we need food. The virus is called COVID-19. It makes me feel like we are in a jail forever, but the jail is our home and we don't know how long we are staying home. I do know that my sister and I are not going back to school for the rest of the year. We now do online learning, which I like. My Mom is also scared to send us back to school, and she is afraid of the virus. I do not like it when she has to go out to get groceries, and I get really worried.

I still get to talk with my friends on video chat. I go bike riding with my family, but we do not stop by the parks. I miss going to play in the park. I get to do lots of arts and crafts and cooking with my Mom. In conclusion, I pray every day that they find a cure for COVID-19, and things can go back to normal. I just want to run and play with my friends.
