“On March 12, when my mom picked me up, I heard something called Covid-19 will cancel school.”

Now, it is June 1st, and I have been away from school for ten weeks. There are some good things and some bad things about staying home.

Some good things are: I can play video games from the library without needing them to be renewed. I also like, that we don't need to wake up so early for school. Instead of waking up at 8 o'clock, I can get up at 9:00 am. I like that we don't need to eat packed lunches now. Mom and dad make fresh lunches every day!

Things I don't like about Covid-19 is that we can't go to the school playground. It also does not let us go on school field trips. I can't even do my After-School Courses my mom was going to sign me up for.

I hope this doesn't continue. I miss school field trips, party days, friends, and recess.
