“But now we eat all three meals together. I am having a lot of family time. I am watching lots of TV shows and eating many junk food these days.”

COVID-19 changed my daily life into some good and bad habits. I wake up in the morning, I and my family go on a walk. Sometimes we go in the evening too. I am also very healthy with my tasty smoothies I make most days. Before the COVID-19 pandemic, I used to go swimming 4 days a week and we didn't eat dinner or lunch together. But now we eat all three meals together. I am having a lot of family time. I am watching lots of TV shows and eating many junk food these days.

Most people like this lockdown because they get to work at their own pace at their own place. But I like going to school and working around with other people who are working on the same assignments and I miss eating lunch together.

I feel sorry and scared for the people who are suffering and dying from CORONAVIRUS. I feel proud of the front line workers who are risking their lives to help us stay safe and healthy. I hope that everyone is soon safe because then I and the world's life would become back to normal.
