**“Because of Covid-19, schools are closed and we stay at home. That is why my relationship with my family is a lot stronger. My relationship with my friends is weaker because I do not see them often.”**

Covid19 is a virus that has killed hundreds of thousands of people. It mostly kills old people. This virus infects and kills older people because they have weak immune systems.

This virus was discovered in December in Wuhan china. People believe this virus started when people were eating bats and one of the bats had the virus. Covid19 spreads by people coughing and sneezing and not covering their mouth with a mask. It could also spread by going into your eyes, mouth and nose.

Covid 19 affects people's lungs and if your lungs have water you can not breathe and you die. The symptom for Covid19 is headaches, tiredness, dry cough, shortness of breath, vomiting, loss of appetite, loss of taste, aches and pains and high fever. Scientists have been working on a vaccine for this virus.

Because of Covid19 everywhere is closed like the shopping malls, mechanic shops, schools, stores, airports and parks. The restaurants are closed because of Covid19 but the drive thru is open.

People must protect themselves from Covid19 by wearing masks and gloves plus using hand sanitizer when going to the groceries stores. In many grocery stores there is a big lineup because they do not want too many people in the store. Also the cashiers have screen shields to protect themselves from customers coughing and sneezing.

At first people thought the groceries stores were running out of supplies so people bought a lot of food like rice, beans, wheat, spaghetti and oil plus people bought a lot of toilet paper.

Covid19 means it's a viral virus, id means the identity and it was discovered in 2019. Covid19 has spread all around the world because at the beginning people traveled from China to other countries.

If people have Covid19, they must stay at home for 14 days. Because of Covid19, schools are closed and we stay at home. That is why my relationship with my family is a lot stronger. My relationship with my friends is weaker because I do not see them often.

I hope that the scientists would make a vaccine for this virus soon because I want to go to the park and I want to see my teachers and my friends and I want all of the stores to open and the shopping malls.

I hope that other people get their jobs too so the community could be busy again and not be really quiet and boring.

I feel sad for the people who died and I feel sorry for their families. I want the community to get back to normal and I hope that scientists make a vaccine against this virus. We must protect ourselves, our families and our community by wearing masks, gloves and using hand sanitizer when going out of our homes and when not feeling well we must stay at home.
