“We were supposed to go to Disneyland. It was too risky, so we did not go. I was really looking forward to it because I never went to Disneyland.”

Hello, and today I want to tell you how Covid-19 has affected my life. Covid-19 changed my life in lots of different ways. One of the biggest ways that it has changed my life is school. My life now is sitting at home on my chair doing work on my computer. I don't stay on the computer for six hours like I do at school, or else I would have really bad eyesight because I already have bad eyesight. I stay on the computer for around two hours. I don't see my friends now because everyone's social distancing. My mom wants me to run every day now because she said that now school is gone. I don't get enough exercise (we go in the morning because in the afternoon it is too hot). When it's raining we don't go out ,or wait for the afternoon. Some of my relatives were going to come here in the summer , but now they can't come anymore because of Covid -19. At the march break we were supposed to go to Disneyland. It was too risky, so we did not go. I was really looking forward to it because I never went to Disneyland.
