“Although sometimes I am bored, I think of what my teacher told me that we should be grateful for some place to stay and family to talk with. I think that she is right, so I try to think of the situation in that kind of way”

I can't go to school and see my friends and teachers during this pandemic, but we can still do some communicating together via Hangouts chat or sometimes video call with others. Sometimes, my parents and I bake cookies or we try out some delicious recipes. The relationship between friends and I hasn't changed much but I am starting to feel lonely without them. When I get back to school I will focus on my work, and hang out with my friends at recess. And of course, follow the rule of social distancing.

Our community is basically staying at home, but since it is phase 2, there have been minor parties and gatherings, like about 5-9 people party/gathering, and they BBQ together in their houses.

The only exercise I get is that I ride my bike around the same boring place and I'm like, "AHHHHHH!!! I DON'T WANT TO STAY AT HOME ANYMORE!!! I WANT TO GO OUTSIDE!!!" Ugh... I am so bored... Why can't I just go to school??? When I am bored at home I just groan. I hate this virus! Before I could play with my friends, but now I only play with my teddy bear and Detective Pikachu, my little Pokemon whose tail is dangling and that he keeps on asking me for coffee and cheese. "La la la la la, it is so boring, la la la...". That's the song I sing when I am bored.

Although sometimes I am bored, I think of what my teacher told me that we should be grateful for some place to stay and family to talk with. I think that she is right, so I try to think of the situation in that kind of way. It may not be fun to always stay at home, but as Trudeau said, we can get through this

pandemic if we work together, and keep each other safe by physically staying apart but communicating in different ways.

I hope that life will come back to normal and Covid-19 will be over soon.
