**“When I go back to school my mind will be a blur! When quarantine started almost everyone was saying “I miss school” but now I am used to this routine of staying home.”**

Coronavirus in my opinion has changed many lives including mine. Most of the time I just watch T.V or I get some exercise. I bet we all have a reason to miss our friends. Sometimes I use the app Instagram to talk to some classmates. When I head outside I always wear a mask and I see others wearing one too! Before people who were sick would wear a mask but now almost everyone wears a mask. When I go back to school my mind will be a blur! When quarantine started almost everyone was saying “ I miss school “ but now I am used to this routine of staying home. I read some online books to help me pass time and cope with Covid-19. Me and my family played sports over the past 3 months. My relationship with my family has not changed at all which is a good thing? Me and my friends sometimes talk on the phone. I hope to meet and see my friends again. When I walk outside my house to say Hi to my neighbors most of the time no one is outside. I hope this pandemic will end soon!
