Dear reader,

My life has changed since the beginning of COVID-19.

I like to be in school to see my teacher, friends and classmates. But when the COVID-19 has started all of those changes. I can't go to school to see my teacher and friends and classmates.

Before my routine is wake up, brush my teeth, eat breakfast and go to school in the morning. In the afternoon after I leave my school, I go to YMCA, after YMCA I go home, watch TV, eat dinner, brush my teeth and go to sleep. Now my routine wakes up, brushes my teeth, eats breakfast and does homework. But sometimes after I eat my breakfast I go play tennis, after homework I watch TV. And the same as the routine before COVID-19.

My relationship with my friends has changed, I can't see my friends most of the time. My relationship with my family has changed, my mom has to scream at me most of the time because I always stay at home and I can't go to school.

Some new things I've tried with my family are playing board games such as Risk, monopoly, memory chess. Some changes I've seen in my community are less people on the road, more take out.

In conclusion I don't want COVID-19 to spread out into my community.

Sincerely,
Joshua Luk
