“Students will have sanitizing products on their desk, they will have to wash hands repeatedly, they will have to practice social distancing for when they go out for recess and other places.”

Now that Covid 19 is here there are a lot of things we can and can't do. I don't get to see family & friends as much as I used to, or see my friends at school for the whole day. Nobody is allowed to have large gatherings/parties bigger than 10 people and we can't travel anywhere far for vacation or anything. Sadly, amusement parks, sports camps, camps are closed down and you have to cancel anything related to it and you have to cancel business trips or other things. Since some of my friends are not in my class, it is very hard to get in touch with them especially if you don't have their phone number. Ever since Covid 19 has started affecting a lot of people, it has made my family and I feel a little bit unsafe from most people getting it. When the kids start going back to school ,desks will be further away from each other, there may be class rotation(different students will go on different days), maybe there will be a day or 2 of online class. Students will have sanitizing products on their desk, they will have to wash hands repeatedly, they will have to practice social distancing for when they go out for recess and other places.
