"I would like to talk about what new changes are happening in my community because of the pandemic. The playgrounds are stripped with tape. More people wear masks now. And fewer people walk around. But, not all people social distance, only some."

I would like to share how my life changed during COVID 19. First I would like to talk about how my routine changes. I can wake up later because I don 't have to go to school anymore. Because I wake up later I have less time to do work. Since the COVID 19 disease is a pandemic we can not travel anywhere. Second, I would like to talk about what I miss doing in this pandemic. I miss going to my grandmas' house because it is such fun there. I also miss playing baseball, especially hitting. Third I would like to talk about what coped me during this time. When I call my grandma it makes me happy and copes me. Fourth, I would like to talk about how my relationship has changed because I am trying to stay away from my grandma and my friends. Fifth, I would like to talk about what communication I have used. I use my home phone to call audio. For the video call, I use WhatsApp and facetime. When I call my grandma I use facetime. When I call my uncle I use WhatsApp. Sixth, I would like to talk about what new things I tried with my family. One of them is how to pitch a baseball, it is pretty hard at first but I got the hang of it. The next one is cooking, before the pandemic, I never really tried to cook but now I am really good. Seventh, I would like to talk about what new changes are happening in my community because of the pandemic. The playgrounds are stripped with tape. More people wear masks now. And fewer people walk around. But, not all people social distance, only some. Finally, I would like to talk about what will I do differently when I return to school. I will now try to physical distance and social distance for safety. That is what is happening during the COVID 19 pandemic.
