“I am allergic to boredom and I am experiencing it every day but if it was not Covid I would have so many things to do in the summer.”

I have been Feeling very bored during quarantine because I can't go anywhere and I don't have anything fun to do at my house because the park that is next to my house is closed and I can't go there because it is closed and If I do go there then my family will get charged and it has changed my life because I used to go outside everyday but in the summer I would go play in the park or go to the pool almost everyday or week and now I am stuck at my house doing nothing and I also have allergic reactions everyday because I am allergic to boredom and I am experiencing it every day but if it was not Covid I would have so much things to do in the summer and I can't do the one thing that I look forward to most in the summer is visiting my family in India and I used to be able to visit them every summer and now I cant which is a big change for me this summer and I have not gotten used to any of these things even though I have been in quarantine for more than five months!
